

# Simply Queen performs for Food & Fellowship Mission

Approximately 425 people attended the "Simply Queen" show at the Caboto Club last Friday night. The show raised approximately \$2,700 for the Amherstburg Food and Fellowship Mission with Rick Rock, who performs as Freddie Mercury, stating more donations could come in. For more on the band, visit [www.simplyqueen.com](http://www.simplyqueen.com) while the mission's website is [www.aburgmission.ca](http://www.aburgmission.ca).

## NOTICE OF STUDY COMMENCEMENT SCHEDULE 'B' CLASS ENVIRONMENTAL ASSESSMENT SOUTHEAST QUADRANT SANITARY AND WATER SERVICING STUDY TOWN OF AMHERSTBURG

The Town of Amherstburg has initiated a Municipal Class Environmental Assessment (Class EA) to provide proposed new developments in the southeast quadrant of the urban hub of the Town with adequate water and sanitary sewage servicing. The study area is outlined on the key plan below. Stantec Consulting Ltd. has been retained by the Town of Amherstburg to complete the study.

The southeast quadrant, approximately 289 hectares (ha), is comprised mostly of rural agricultural land with small pockets of residential land use. The area is not presently serviced by an existing municipal wastewater collection system and the existing watermain system is not sized sufficiently to support future growth. Within the southeast quadrant, existing residential lots are generally serviced by private on-site sewage disposal systems, typically consisting of septic tanks and leaching beds and small watermains. In 2014, the Town of Amherstburg completed upgrades and expansion of the existing Amherstburg Wastewater Treatment Plant (AWWTP) and upgrades to the main sewage pumping station, to accommodate current and future wastewater flows. Several developers have requested that the Town of Amherstburg install the necessary sanitary and water servicing infrastructure in the southeast quadrant to allow for the orderly development of the lands.

The study will address impacts to existing and surrounding lands and to the environment.

The study is being undertaken in accordance with the planning and design process for 'Schedule B' projects outlined in the Municipal Class Environmental Assessment (June 2000, as amended in 2007, 2011 and 2015) under the Ontario *Environmental Assessment Act*.

A key component of the study will be consultation with interested stakeholders. Two Public Information Centres (PIC) are currently planned for this project. The PICs will be held to present and discuss the need and justification for the requested municipal infrastructure servicing, the existing study area conditions, and assessment of alternative solutions and design concepts.

At this time, the study team is requesting comments regarding the existing conditions and related infrastructure in the study area. If a person wishes to comment on this project, have your name added to the project mailing list, or have any questions about this project, please contact one of the individuals identified below:

Mr. Clarence Jubenville, P.Eng.
